PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the CIA Photographic Intelligence Division.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

Bobrovskiy (Donok) Regional Military Storage Area is located (Figure 1) approximately 6 kilometers (km) east of Bobrovskiy. The installation is served by a spur from the Sverdlovsk--Kamensk-Uralskiy rail line and has probable hard-surface road access to Sverdlovsk. Other military installations in the vicinity include the Bazhenovo Ammunition Depot, 23 km northeast.

This double-secured installation (Figures 2 and 3) covers approximately 1,000 acres and includes 34 storage buildings, two transloading buildings, and six support buildings in the main storage area. A support area to the west of the

installation includes one administration building, four administration buildings/barracks, nine barracks, 10 storage buildings, and 28 support buildings. Two motor pools located directly north of the support area include three vehicle sheds.

Comparative analysis indicates a probable increase in the level of usage of this installation since initial coverage by [redacted]. Significant changes [redacted] include the replacement of one vehicle hardstand by two vehicle hardstands and three vehicle sheds, and the addition of six barracks, numerous support buildings, one storage building, and six probable storage buildings under construction.

DESCRIPTION OF INSTALLATION

Railroad Service

The installation is served by a spur from the Sverdlovsk--Kamensk-Uralskiy rail line. Several sidings and one railroad transshipment facility are located in the installation.

Road Service

The installation has probable primary road access to Sverdlovsk.

Administrative and Troop Housing Area

Area D contains one administration building, four administration/barracks, nine barracks, 10 storage buildings, and 28 support buildings. The level of activity indicates a probable increase in the level of usage [redacted].

Five barracks have been added since [redacted]

General Storage Areas

Area E1 contains six rail-served storage buildings, one transloading building, and one support building.

Area E2 contains 28 storage buildings, approximately 135 by 55 feet, one transloading building, and five support buildings. The storage buildings are separated by a rail/trench system which is used in the movement of material between the rail spur and the buildings.

Equipment Storage/Maintenance Areas

Area J1 contains one vehicle hardstand and one 155- by 60-foot vehicle shed. Area J2 contains one vehicle hardstand and one 105- by 45-foot and one 90- by 30-foot vehicle shed. Two hardstands were added [redacted]. The original hardstand reported [redacted] has been removed.

Unidentified Facilities or Tracking Activity

Area T1, located in the eastern section of the installation, contains 26 mounds covered by vegetation. No connection between mounds and adjacent roads is discernible.

Area T2, a cleared strip in a wooded area located at the east end of the installation, appears on all [redacted] photography.
